

## ADAY IN JUNE

Will See Peary Begin Another Journey.

## TO THE FAR NORTH

He Intends to Make One More Effort to Reach the North Pole—Plans are Well Under Way.

New York, April 10.—The application of Robert E. Peary, U. S. N., for leave of absence for three years which was approved Tuesday by the secretary of the navy, has uncovered the fact that Commander Peary purposes to make another attempt this summer to reach the North Pole. The three years' leave of absence during which he made his famous journey to the farthest point north ever reached by man—87 degrees 6 minutes—expired last Sunday and the new leave begins at once.

Preparations for another dash toward the pole have been under way all winter, but Peary and his associates of the Peary Arctic club have been keeping secret their action, as it was felt that it would be a breach of courtesy, if not of discipline, for the naval officer to announce his voyage until his superiors made it possible by their approval. The order granting the leave of absence stipulates that the time is to be devoted to arctic exploration. June is the month in which the start is to be made.

Funds necessary for the next trip to the North Pole have not yet been obtained in adequate quantity, but there is no uneasiness as to that. Morris K. Jesup and another well known man of wealth, who wished his connection with the enterprise to be kept secret, furnished practically all of the \$150,000 necessary for the purchase of the Roosevelt and the fitting out of the expedition.

The Roosevelt is at Shooter's Island and is being refitted with new boilers. Those used during her last voyage did not supply adequate power and were credited with being one of the greatest drawbacks to the complete success of the expedition.

Capt. Robert Bartlett, of St. Johns, N. F., sailing master of the Roosevelt, has been notified to come to New York in May to superintend the fitting out of the vessel. Commander Peary, before the end of his last voyage, determined to select his own crew for his next advance on the pole, to avoid the troubles which arose because of discontented spirits among his last ship's company. He will pick every man to be taken.

Sledges will again be the dependence of the explorer, and he will again follow the American route, making a dash across the ice from his winter quarters toward the pole, which he is more confident than ever of reaching.

### Hundley Gets a Life Job.

Washington, April 10.—President Roosevelt has appointed Oscar P. Hundley, of Huntsville, Ala., to be United States judge for the Northern district of Alabama. The president's action ends a long contest for this office for which there were a number of applicants, both republicans and democrats. Accompanying the announcement of the appointment Secretary Loeb gave out a long list of endorsements filed by Judge Hundley with his application for appointment.

## CHARGE OF FRAUD

Is Brought Against the Secretary of the Uncle Sam Oil Co., a Widely Advertised Concern.

Topeka, Kan., April 10.—Following his indictment on the charge of using the mails to defraud, H. H. Tucker, jr., of Cherryvale, Kan., secretary and promoter of the Uncle Sam Oil Co., who was arrested in Kansas City, was arraigned in court here Tuesday. Judge Pollock fixed Tucker's bond at \$15,000 and he left for Kansas City in charge of an officer of the court to secure bail.

It is charged that Tucker has sold about \$1,200,000 (cash value) in stock in the Uncle Sam Oil Co. with a par value of over \$10,000,000; that about \$20,000 paid in dividends was taken from the receipts of stock sales and not from the earnings of the company, and that while this was going on Tucker was using the mails to accomplish the sale of more stock; also that the assets of the company are \$150,000 less than the money received from the sale of the stock.

Before starting for Topeka, Mr. Tucker gave out a printed statement defending his action and saying: "I have solicited money from the people of the United States in absolute good faith and with this money have built three refineries, 150 miles of pipe line and purchased thousands of acres of the best oil lands in Kansas and the territories."

## IN BAD LIGHT

Binger Hermann Is Put by His Own Words.

## IN THE LIMELIGHT

Of a Merciless Cross-examination He Is Shown to Have Given Considerable False Testimony.

Washington, April 10.—Interest in the trial of Binger Hermann, for destroying public records, received a decided impetus when the defendant, who had been testifying in his own behalf for the past five days, was put under cross-examination Tuesday.

After saying positively that no members of his family had acquired public lands during his administration, Mr. Hermann qualified the statement later by admitting that his son Schiller had made a homestead entry to which title had not yet been acquired; that Schiller had purchased three such entries before patent had issued to the claimants, and that these purchases had been acquired for \$3,000 by the defendant to relieve Schiller's embarrassed financial condition.

Mr. Hermann admitted that he had acquired 30,000 acres of public lands in Oregon when he was receiver of public moneys at the Roseburg land office. This, he maintained, was not the cause of his losing that position. The records of these transactions as well as those relating to the claims purchased by Schiller were made exhibits in the case. In the latter matter Mr. Hermann had written directing the patents to be mailed to his son.

United States Attorney Baker's next move was to produce the copy of a telegram sent by the defendant to P. F. Mays, of Portland, Ore., July 2, 1902, three days before the proclamation creating the Blue Mountain forest reserve, which Mr. Baker contended was the "tip" promised Mays by Hermann that the former might take the necessary steps to make entry in the state school lands he was negotiating for in the reserve. It read:

"Fifteen patents to timber land entries forwarded to Roseburg land office. Land office has recommended withdrawal original Strawberry Mountain and all additional to secretary, who has approved the same.—Binger Hermann."

On his direct examination Mr. Hermann had testified that he had never had any business relations with Mays, had never written him communications, nor had interviews with him; that Mays had no interest in the Blue Mountain reserve that Hermann knew of, and that he wished the jury and court to understand this statement to be as strong as the English language could make it.

Mr. Baker read this statement from the record and asked the defendant if when he made it he did not think all traces of this telegram had been destroyed in the destruction of his letter books. Mr. Hermann would not admit this. He said he now remembered the telegram and explained it must have been sent either in answer to a telegraphic request from Mays, or more likely, because Hermann knew Mays as a leading public man of Oregon and simply wished him informed of the action taken.

Mr. Baker placed in evidence the endorsement of Mr. Hermann and Senators Mitchell and Delph, on a petition for the appointment of Mays as district attorney, after which Mr. Baker remarked:

"He was fired from that position, was he not, for Chinese frauds?" Mr. Hermann admitted Mays had lost the position.

## HUMORS IN THE BLOOD

Coming of Warm Weather Forces Them Out, Causing Itching, Burning Skin Eruptions.

The blood and skin are so closely connected that whatever affects the one has a corresponding effect on the other. When the blood is pure and healthy the skin will be soft, smooth, and free from all eruptions; but when the blood becomes infected with some unhealthy humor the effect is shown by rashes, eruptions, boils and pimples, or other disgusting and annoying skin disease.

The skin is provided with countless pores and glands which act as a drainage system to rid the body of impurities through the perspiration that is constantly passing through these little tubes. There are other glands that pour out on the skin an oily substance to keep it soft and pliable, otherwise it would become hard and dry from constant exposure to wind and sun. When the blood becomes filled with humors and acids these are thrown off through the pores and glands, burning and irritating the skin and drying up the natural oils so that we have not only Acne, Eczema, Salt Rheum, etc., but such dry scaly skin eruptions as Tetter, Psoriasis and kindred troubles.

These humors find their way into the blood through a disordered or deranged condition of the system. There is a certain amount of waste or refuse matter collected in the body every day. This is useless in nourishing or keeping the system in health, and nature intends that it shall find an outlet through the channels of bodily waste. As long as these members perform their duties properly the blood remains pure and free from infection; but when from any cause they become dull and sluggish, this refuse matter is left to sour and be taken into the blood in the form of humors and poisons. The skin is a perfect index to the blood; when we see one afflicted with a skin disease, or pimples, rashes, eruptions, blotches, etc., constantly appearing, we know that down deep in the blood a humor has taken root, and instead of supplying nourishment and strength to the fine, delicate tissues of the skin, it is pouring out its acid and unhealthy accumulations.

The skin is not only affected by the humors generated within the system, but poisons from without, such as Poison Oak and Ivy, Nettle Rash, etc., as well as poisons from metals, acids, etc., enter through the open pores and glands, and so thoroughly do they take root in the blood that they are ever present, or return from year to year to annoy the sufferer.

The treatment of skin diseases with salves, washes, lotions, etc., is along the wrong line. True such treatment relieves some of the itching and discomfort, and aids in keeping the skin clean, but it does not reach the real cause of the trouble, and at best such things are only palliative and soothing.

A thorough cleansing of the blood is the only cure for humors in the blood. S. S. S., a gentle acting, safe blood purifier, made entirely of vegetable ingredients from nature's forests and fields, is the proper treatment. S. S. S. goes down into the circulation and neutralizes the acids and humors, thoroughly cleansing and purifying the blood, and curing skin diseases and affections of every kind. It supplies to the

body, and rids the blood of any and all poisons. S. S. S. cures Eczema, Tetter, Acne, Psoriasis, Salt Rheum, Poison Oak and Ivy, Nettle Rash and all troubles of the skin. Special book on skin diseases and any medical advice desired furnished by our physicians without charge to all who write.
